#### Advanced JavaScript Tutor

7/17 – present

Full-Stack Development using Mongo / Express / React / Node

**Technologies** 

I provide 1:1 instruction in writing idiomatic JavaScript using best practices and design patterns.

Heroku / AWS S3 / mLab / Sass

I have helped 15+ students exceed their coding goals in everything ranging from beginner-level HTML/CSS/JS/jQuery to advanced full-stack development using the MERN stack (Mongo / Express / React / Node).

### **Testing Frameworks**

Mocha / Chai / Jest

Fun fact: over half of my students are referred to me by <u>Alchemy Code Lab</u> (formerly known as Code Fellows PDX).

**Dot & Bo** 8/14 – 9/16

Team & Systems Lead, Customer Experience

Re-hashed the CRM strategy of a <u>leading e-commerce site</u> by automating our <u>Desk</u> platform using <u>Liquid</u>, <u>Zapier</u>, and <u>Formstack</u>. This improved the team's efficiency by over 30% and raised our CSAT score by 10%. I coded our customerfacing Help Center using <u>Spree</u>, and implemented CSAT collection using <u>SurveyMonkey</u>. Supported an in-house and remote team of 16, along with analyzing and presenting NPS/CSAT data weekly.

## Open Source Contributions

Apache DataFu™ is a project undergoing incubation at Apache. I updated their website so it would meet Apache's requirements for graduation.

### Strengths Design & UX

Design & UX
Training & Development

### **Specimen Magazine**

7/12 - 1/15

**Education** 

Content Director & Technical Editor

Directed the content, technical editing, and marketing of a nationally-distributed science magazine.

**Code Fellows PDX** *Advanced Full-stack JavaScript* 

The magazine was comprised of long-form conversations with leading scientists. I interviewed world-famous technologists and academics like <u>Nir Eyal</u>, <u>Dr. Judea Pearl</u>, and <u>Leonard Kleinrock</u>, then worked with them to publish the resulting material.
