AppLab
Freelance Front End Developer   3/25 – present

Building and maintaining a video-based review app for a startup in stealth mode, with a tech stack comprised of Node / React / React Router / Firebase / Webpack.

Also working on a real estate app that is hitting the app store in early May.

Alchemy Code Lab
Teaching Assistant   7/17 – present

Provide 1:1 instruction in writing idiomatic JavaScript that utilizes best practices and design patterns. I have helped many students exceed their coding goals in everything ranging from beginner-level HTML / CSS /JS / jQuery to advanced full-stack development using the Mongo / Express / React / Node stack. Worked at Alchemy Code Lab from 1/18 – 3/26; independently since 7/17.

Dot & Bo
Team & Systems Lead, Customer Experience   8/14 – 9/16

Re-hashed the CRM strategy of a leading e-commerce site by automating our Desk platform using Liquid, Zapier, and Formstack. This improved the team's efficiency by over 30% and raised our CSAT score by 10%. I coded our customer-facing Help Center using Spree, and implemented CSAT collection using SurveyMonkey. Supported an in-house and remote team of 16, along with analyzing and presenting NPS/CSAT data weekly.

Specimen Magazine
Content Director & Technical Editor   7/12 – 1/15

Directed the content, technical editing, and marketing of a nationally-distributed science magazine. Worked directly with the design team on layout and presentation.

The magazine was comprised of long-form conversations with leading scientists. I interviewed world-famous technologists and academics like Nir Eyal, Dr. Judea Pearl, and Leonard Kleinrock, then worked with them to publish the resulting material.

Technologies

Full-Stack Development using Mongo / Express / React / Node

Heroku / AWS S3 / mLab / Sass

Testing Frameworks

Jest / Mocha / Chai

Open Source Contributions

Apache DataFu™ is a project undergoing incubation at Apache. I updated their website so it

would meet Apache's requirements for graduation.

Strengths

Design & UX
